PROFESSIONAL EXPERIENCES

Central China Securities

OTC Derivatives Risk Management Manager, OCT Trading Business Department

Shanghai, China

08/2022-08/2025

- Served as a co-founder of the OTC Trading Business Department. Responsible for contract review of over-the-counter (OTC) derivatives trading, setting risk management thresholds, managing market and liquidity risks, overseeing company operations, preparing data analysis reports, and enhancing risk management rules.
- Constructed a stock scoring system with data retrieved from over 5,000 publicly listed companies, including scale factors, financial statements, volatility, and liquidity, using Wind MATLAB. Developed a model for stock pricing based on risk factors.
- Conducted data analysis research for the client, xQuant Company, and developed a management system for OTC derivatives. Collaborated with software development engineers on customized functions and system testing.
- Delivered operational data analysis reports with MATLAB on the department's business to support the finance department in valuation and profit-loss analysis. Managed the department's funds, position holdings, and valuations.
- From September to October 2024, negotiated with external trading stakeholders to resolve conflicts arising from the loss of 0.1 billion dollars incurred by the investment department, aiming to balance the budget and manage funds.

Gelin Dahua Capital Management (owned by Shanxi Securities)

Risk Management Associate

Shanghai, China

10/2020-08/2022

- Got promoted to the position in charge of overall risk management of all business operations in the company. Responsible for risk management related to market, credit, operations and liquidity, and developed assessment metrics for over 20 types of risk management reports.
- Constructed the Enterprise Risk Management (ERM) system for the company, which consists of three modules: risk and control self-assessment (RCSA), key risk indicators (KRI), and loss data collection (LDC). The system processes all the risk management-related data for the entire company.

OTC Derivatives Risk Management Associate

04/2018-10/2020

- Applied Monte Carlo simulation with MATLAB to conduct risk management for OTC derivatives and prepared daily reports, which supported the improvement of risk management models for OTC derivatives.
- Performed research on the risk management of OTC derivatives with data of futures and options' volatility and basis collected from the Stock Exchange, contributing to the development of an OTC options management system.
- Led the product management team for the OTC business and innovated new business models by combining insurance and futures to transfer risks for agricultural sectors. Awarded *Excellent New Employee* in 2018.
